

OUR LADY *of* MALIBU SCHOOL

Glen Sunyich

Our Lady Of Malibu School
Technology

Hi, my name is Glen Sunyich and I teach technology at Our Lady Of Malibu School. After graduation from Don Bosco Technical Institute I attended Cal Poly Pomona as a dual major in Engineering and Mathematics. I received a Bachelor of Science Degree in Electrical Engineering and taught undergraduate Calculus classes while working on my Masters degree in the mid 70's.

I attended graduate classes in Applied Mathematics at Northrop University and my Masters of Business administration at Pacific Coast College.

I ran a successful Engineering business for 30 years until I retired 12 years ago.

As part of this business I taught classes in Applied Mathematics and Computer Aided Drafting to Engineers and design professionals for many of our Corporate and Government customers. I also taught classes to teachers in classroom integration of new technology.

I have taught at OLM the past 10 years mostly as a math, science and technology teacher.
